Dear Gemma,

I am sorry for the late reply. I had thought that my positive reply to Prof. Fuqing Zhang would be sufficient. He just wrote to me that I need to also reply to you.

Yes, I agree to contribute an article described in your email to the Encyclopedia.

Thank you!

Minghua Zhang
Professor
Stony Brook University

Subject: Encyclopedia of Atmospheric Science - Invitation to contribute

Dear Prof Minghua Zhang,

I am pleased to announce that the Encyclopedia of Atmospheric Science, 2nd Edition, due to be published in 2013, is currently in preparation. We aim to produce an authoritative and comprehensive reference source. This work will be added to the list of other very well-known and successful Reference Works published by Elsevier.

On behalf of the Editors, **Prof Gerald North**, **Fuqing Zhang** and **John Pyle**, I wish to invite you as an acknowledged authority, to update your original article from the first edition.

Article Title: "Coupled Ocean-Atmosphere Models Model Physics MS 500"

The 2nd edition of the Encyclopedia of Atmospheric Science will provide broad ranging, validated summaries of all of the major topics in the field, written by a team of leading experts, under the guidance of the Editors.

The text of the articles will be written at a level that allows undergraduate students to understand the material, while providing active researchers with a ready reference resource for information in the field.

This work will be published online on Elsevier's Science Direct platform. With online access researchers can quickly and easily link within the work all from the convenience of their desktop. We therefore also encourage authors to submit colour artwork and multi media components.

Authors will be expected to submit a chapter within 5-6 months. Except in special circumstances, each article should be approximately 4000-6000 words long, plus figures and tables. In return, we can offer the lead author of each article an honorarium and provide an electronic offprint of the Contribution in PDF format. As an author, you will also benefit from 25% discount off all Elsevier books, excluding Major Reference Work titles which carry a 10% discount.

If you wish to enlist one or more co-authors, you may do so. Alternatively, if you decide that you are unable to contribute, it would be of great help to us if you could suggest a suitable replacement.

We very much hope you will agree to participate in this exciting venture. Please indicate your willingness to contribute by replying to this message within the next 2 weeks. If we do not hear from you, please be aware that your article will either be reprinted without alteration or updated by another author. On receipt of your confirmation we will send you a Contributor Agreement and Login details to our Electronic Manuscript Submission System.

If you have any questions about the article or the Work please don't hesitate to contact me.

We look forward to hearing from you soon.

Kind regards,

Gemma
